

THE B.R.I.T.

BACKER ROD INSERTION TOOL

TECHNICAL DATA SHEET

1. Product Name: **The B.R.I.T.**
2. Sold By: **Backer Rod Mfg. Inc.**
4244 N Broadway
Denver, CO 80216
Phone: 800-595-2950
Fax: 303-308-0393
Website: www.backerrod.com

3. Product Description:

Backer Rod Insertion Tool Complete Kit:

Set includes complete body with threaded swivel connection for handle and 5 'skates' in the following sizes (width x depth):

- 3/32" x 5/16"
- 1/4" x 1/2"
- 1/2" x 1/2"
- 3/4" x 1/2"
- 1" x 1/2"

Specific Uses Include:

The correct depth control for backer rod installations in areas such as:

- Expansion joints
- Highway joints
- Concrete tilt walls
- Precast concrete
- Parking Decks
- Curtain walls

4. Composition and Material

The B.R.I.T. is manufactured from High Density Nylon which gives it a low coefficient of friction, so it slides easily on different surfaces. The B.R.I.T. will not easily scratch or break during use on rough concrete floors or walls.

5. Installation

Joint openings must be free of all contaminants, loose materials, dry and free of frost. Select correct rod size for joint widths. Select proper 'skate' for joint width and rod depth. Use the B.R.I.T. to seat the rod to the depth recommended by sealant manufacturer. For floor joints, handle may be replaced by a standard long broom handle at the threaded swivel connection.

6. Compatibility

The B.R.I.T. is chemically inert and will resist gasoline, oil, and most solvents. Product will not stain or adhere to backer rods or substrate.
